Awareness Watch™ Newsletter

By Marcus P. Zillman, M.S., A.M.H.A.
http://www.AwarenessWatch.com/

V7N6   **June 2009**

Welcome to the V7N6 June 2009 issue of the **Awareness Watch™ Newsletter.** This newsletter is available as a complimentary subscription and will be issued monthly. Each newsletter will feature the following:

Awareness Watch™ Featured Report
Awareness Watch™ Spotters
Awareness Watch™ Book/Paper/Article Review
Subject Tracer™ Information Blogs

I am always open to feedback from readers so please feel free to email with all suggestions, reviews and new resources that you feel would be appropriate for inclusion in an upcoming issue of Awareness Watch™. This is an ongoing work of creativity and you will be observing constant changes, constant updates knowing that "change" is the only thing that will remain constant!!

Awareness Watch™ Featured Report

This month's featured report will be highlighting my publication **Searching the Internet - A Primer**. This publication is also available at the following URL:

http://www.SearchingTheInternet.info/

This publication is designed to give you the resources that will allow you to search the Internet for the various information needs that are required for your business, profession or special interest. It follows a four point system that I have given at presentations, speeches and seminars over many years and will allow you the ease of understanding and implementation for searching the Internet both for the "newbie" as well as the "seasoned veteran" to the World Wide Web and Internet.

Searching the Internet – A Primer

By

Marcus P. Zillman, M.S., A.M.H.A.
Executive Director - Virtual Private Library
http://www.searchingtheinternet.info/

Searching the Internet is now as common place as driving the car and most people consider the use of just one search engine to obtain results that they are looking for. This paper is designed to open your eyes to the many excellent resources on the Internet to search for information and/or to discover new knowledge! This paper will explain to you a number of ways to search for information on the Internet and methods to continue your searches and knowledge discovery. This paper is also designed for the "newbie" to the Internet or for the person who only uses one source to search for information on the Internet.

There are basically four areas to search for information on the Internet: 1) Search Engines, 2) Indexes and Directories, 3) Intuitive Search and 4) Custom Search and Deep Web Search. This paper will give a brief explanation of each area followed by some examples that you may immediately implement! The goal here is to broaden your search horizons so you may make searching the Internet easier to perform. This paper is not designed for advanced or sophisticated searching techniques as these will be addressed in other of my papers, columns and articles.

Search Engines

Search engines on the Internet are powered by "bots" that actively go out and search for meta description and keywords in files that are placed on the Internet. When you visit the search engine and type in the keyword or phrase that you are looking for the results that are generated come from the latest searching by the search engine's bots that are deposited in the search engine's database. The currency of the results is purely based on when the search engine's bots visited the site and brought back the meta information to the search engine's database. There are literally thousands upon thousands of search engines on the Internet and I will list only a few of the larger and better known. I will also list a "list" of search engines all over the world so you can visit many of them to obtain a better understanding of search engines in general!

Indexes and Directories

Most individuals are accustomed to looking for information from directories and indices. This has started with the "telephone" book and then to other similar sources of directory information. The Internet also has a number of directory resources that allow you to search in a more convenient and simple format to find the information that you are looking for by going from menu to menu to menu until you find the subject and/or topic that you are looking for. Many of these are called subject trees, subject directories and are available freely over the Internet. There are literally tens of thousands of directories and subject trees on the Internet and as with Search Engines I will list some of the larger and more popular directories as well as a listing of a Directory of Directories on the Internet.

Intuitive Searching

Intuitive searching on the Internet is a fun way to look for information that could be available. By entering a name … any name into the search engine it will return potentially relevant results. This is also an excellent way to check out an individual by typing in their complete name and observing the results brought back by the search engine. Sometimes this could be very interesting. As an example with Google™ you may search for results from the Web, results from Images, results from Groups, results from Directories and results from News. All these results are available from the labeled tabs at the top of each of Google's pages. Also you may take the intuitive name and add one of the basic seven domain name suffixes to it to obtain potentially relevant results:

IntuitiveName.biz

IntuitiveName.com

IntuitiveName.info

IntuitiveName.net

IntuitiveName.org

IntuitiveName.us

IntuitiveName.ws

Replace the IntuitiveName with the name that you are searching for i.e. Research or ResearchResources, etc. and add one of the suffixes above and then enter it in the URL line of your browser to see if that site exists today on the Internet. Also remember that if you have more than one word that all the words must run together to become a potential domain name (Research.com, ResearchResources.info, etc.). This could be a very interesting and valuable resource to finding information on the Internet and must be done periodically as new domain names are being created daily! If you do not find anything today it could very well be created tomorrow!!
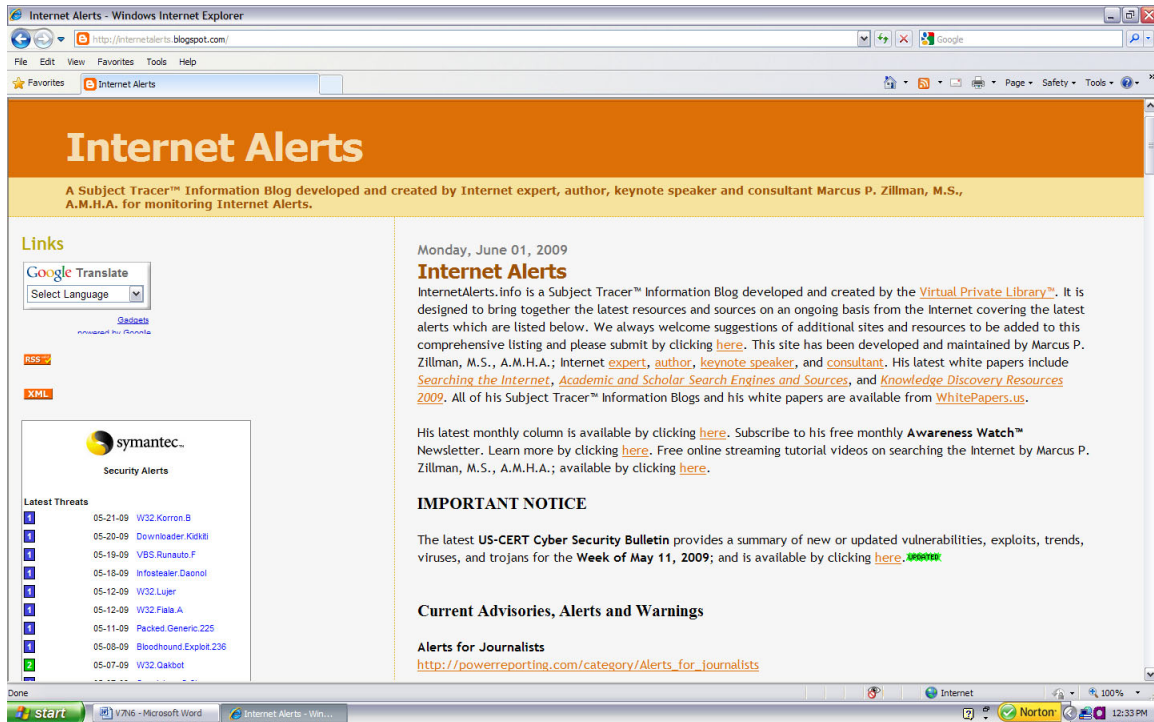

Figure 3: Internet Alerts – InternetAlerts.info Intuitive Name Site

Custom Search and Deep Web Research

Searching the Internet with your own SearchBot or developing a resource list of areas of deep web search will aid you in the discovery of new information as well as going where no search engines have traveled or fear to go! You do not need to be a Geek, Nerd or BotMaster to travel these search areas and I will list some of the highly viewed sites and resources. As the creator of BotSpot.com in 1996 I have used and visited literally hundreds of these resources on an ongoing and continuing basis or I have created these resources to aid the Internet community in discovering information and knowledge in the deep and invisible web. Here are a few of these resources:

Awareness Watch™ Spotters

A Chartbook Of International Labor Comparisons
http://www.bls.gov/fls/chartbook2009/home.htm
A Chartbook Of International Labor Comparisons (March 2009) focuses on the labor market situation in selected countries for the most recent year available; some charts also show trends. This chartbook is presented on the BLS website in Adobe PDF format. The charts and the text for each section will soon be available from this page in individual PDF files; the chartbook is currently available in a single PDF (2.5 MB). This has been added to International Trade Resources Subject Tracer™ Information Blog.

ProMED-Mail - Global Electronic Reporting System for Outbreaks of Emerging Infectious Diseases and Toxins
http://www.promedmail.org/
The global electronic reporting system for outbreaks of emerging infectious diseases & toxins, open to all sources. ProMED-mail, the Program for Monitoring Emerging Diseases, is a program of the International Society for Infectious Diseases. This has been added to Healthcare Resources Subject Tracer™ Information Blog. For additional information about the current Swine Influenza outbreak click here.

Review of Marketing Research
http://www.mesharpe.com/rmr.htm
The Review of Marketing Research annual series provides current, state-of-the-art articles by the marketing field's leading researchers and academicians. In contrast to other research publications in the field that impose rigid limitations on the length of articles, RMR publishes longer chapters that are not only theoretically rigorous but also offer richer detail, including literature reviews, cutting-edge methodologies, empirical studies, emerging trends, international developments, guidelines for implementation, and suggestions for future theory development and testing.

CORDIS - Community Research and Development Information Service
http://cordis.europa.eu/home_en.html
CORDIS, the Community Research and Development Information Service for Science, Research and Development, is the official source of information on the seventh framework programme (FP7) calls for proposals; it offers interactive web facilities that links together researchers, policymakers, managers and key players in the field of research. CORDIS has these main missions: a) To facilitate participation in European Research activities; b) To enhance exploitation of research results with an emphasis on sectors crucial to Europe's competitiveness; and c) To promote the dissemination of knowledge fostering the innovation performance of enterprise and the societal acceptance of new technology. This has been added to Research Resources Subject Tracer™ Information Blog.

Become.com - Shopping Your Way Comparison Shopping Bot
http://www.become.com/
Become.com is a comparison search engine designed to help consumers doing product research on the web. Become.com crawls over 3.2 billion web pages specifically from guides, expert reviews, consumer reviews, articles, specifications, forums, merchants, and a variety of other useful information to help consumers make better buying decisions. Become.com also has a "Nearby Stores" feature that allows users to plug in a zip code and get store names, addresses, phone numbers, hours and Maps. This has been added to ShoppingBots and Online Shopping 2009 Subject Tracer™ Information Blog.

Wellcome Library - Medical History to Present Day Medical Resources
http://library.wellcome.ac.uk/
Collections of books, manuscripts, archives, films and pictures on the history of medicine from the earliest times to the present day. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Intereconomics: Review of European Economic Policy
http://www.intereconomics.eu/
An official publication of the German National Library of Economics, Intereconomics, publishes papers dealing with economic and social policy issues in Europe. The journal consists of editorial, forum, and article sections. The editorial section contains brief comments on current questions of economic policy in Europe or affecting Europe. In the forum section, researchers, politicians, and employer association and trade union representatives voice their opinions on select current economic policy problems affecting Europe. Lastly, the articles section deals with economic policy issues and trends in Europe.

Melt Mail - Your Temporary eMail Forwarding
http://meltmail.com/
Have you ever downloaded a software, where you have to register with your e-mail to receive the activation-code or the download-link? Have you ever registered to a forum with your real e-mail, just to post one question? There are a lot of scenarios as such. And in every case, you give your real e-mail address and get tons of junk-mail as a thankyou. With Melt Mail, you only give your unique Melt Mail address (which forwards to your own), get the desired information and after a defined period of time (the melting point) the Melt Mail address will be deleted. Enter your e-mail address in the text field and choose how long your Melt Mail forward-address should be available -- it's the melting point. After hitting the "create"-button, a unique Meltmail is created which forwards every incoming mail to your e-mail acccount. After the melting point is reached, they delete your real e-mail address from their forwarding database and also the Meltmail won't be available anymore. So, they only store your e-mail address during the period of time you defined with the melting point. Compared to other services, Melt Mail cares about your privacy! First of all, Melt Mail doesn't store any of the e-mails you forward using this service. The system is simply not interested in them. Secondly, the e-mail address you give to us, is only stored in our mail forwarding database during the period of time you define due choosing a melting point. After that period of time, theu only store the normal connection data for the period of time specified by the german law. And the most important part: they don't use your e-mail addresses for sending SPAM or other kind of mails. This has been added to Privacy Resources Subject Tracer™ Information Blog.

MedicalStudent.com - Digital Library of Authoritative Medical Information
http://www.medicalstudent.com/
MedicalStudent.com is a digital library of authoritative medical information and medical education for all students of medicine. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

QueryCat - Search or Browse Frequently Asked Health Questions
http://www.querycat.com/health/
Do you have a question about a medical condition or a treatment you are receiving? Search or Browse QueryCAT Health to find the answers. Comprehensive listing of tens of thousands of frequently asked and answered health questions. This has been added to Healthcare Resources Subject Trace™ Information Blog. This has been added to eHealthcareBot Search Engine.

Open Public Health Journal
http://www.bentham.org/open/tophj/index.htm
The Open Public Health Journal is an Open Access online journal which publishes original research articles, reviews and short articles in the field of public health. Topics covered in this interdisciplinary journal include: public health policy and practice; theory and methods; occupational health and education; epidemiology; social medicine; health services research; ethics; environmental health; adolescent health; AIDS care; mental health care. The Open Public Health Journal, a peer reviewed journal, aims to provide the most complete and reliable source of information on current developments and research in public health. The emphasis will be on publishing quality articles rapidly and freely available worldwide.

Product Planner - View and Create User Flows, Viral Loops, and More
http://productplanner.com/
Product Planner was born out of the need to help people understand and create user flows for their web products. The idea is that by looking at examples of other successful web products, you can get a better idea of how to create your own. Product Planner is brought to you by the folks at KISSmetrics. The KISSmetrics core product is an analytics tool with sufficient flexibility to give you visibility into what's working and what's not in your products. The tools and technology measure what's happening and help you tune your user experience. KISSmetrics will be launching in 2009, they hope you enjoy Product Planner in the meantime. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to eCommerce Resources Subject Tracer™ Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™ Information Blog.

LibertyGuide - eSource for Ideas of Liberty
http://www.libertyguide.com/
The goal of LibertyGuide is to provide a comprehensive, easy-to-search index of resources that will help scholars and other intellectuals pursue their interest in the ideas of freedom. LibertyGuide is a project of the Institute for Humane Studies, an Arlington, VA-based nonprofit that provides assistance and educational opportunities to undergraduates, graduate students, and other scholars pursuing the ideas of individual liberty in their careers. This has been added to Reference Resources Subject Tracer™ Information Blog. This has been added to Research Resources Subject Tracer™ Information Blog.

BoostCam - Free, Instant and Disposable Two Way Video Conferencing
http://www.boostcam.com/
They provide free, instant, and disposable two-way video conferencing. It's simple, fun, doesn't require installing any plugins and, most importantly of all, it's FREE! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Public Relations Journal
http://www.prsa.org/prjournal
The Public Relations Journal, published quarterly by the Public Relations Society of America (PRSA), is an open-access peer-reviewed, electronic research journal facilitating the transfer of knowledge from the educational community to the professional community. It is dedicated to the online publishing of articles by academics or practitioners that examine public relations in depth and/or create, test or expand public relations theory. Also encouraged are notes on research in brief and book reviews. It accepts all appropriate methodologies including social-scientific, case studies, philosophical, legal/historical and critical. This has been added to Advertising, Marketing and Public Relations Subject Tracer Information Blog.

TaskBarn - Free Web Based Project Management and Collaboration Tools
http://www.taskbarn.com/
Taskbarn's easy-to-use project management tools will make your life easier. Communication, sharing, and planning are important elements of every project and Taskbarn helps you with all three. With Taskbarn, you can: a) Organize all project tasks in a TODO list; b) Communicate with project members through private messages and the project feed; c) Share files, web links, and other assets; d) Invite clients, colleagues, and friends to collaborate with you on your project; and e) Access your projects from anywhere with an internet connection. Your projects are private and secure. Only those who you invite can see your project, communicate with you, and share with you. All of your files, private messages, and project feeds are accessible only to invited friends. This has been added to the tools section of Research Rdesources Subject Tracer™ Information Blog.

The Survivor's Manual for The New Economy
http://www.NewEconomyManual.com/
The Survivor's Manual for The New Economy by Marcus P. Zillman, M.S., A.M.H.A.; is
a 239 page digital read that gives excellent resources and annotated sources for the new
economy analytics, alerts, ecommerce, financial sources, invisible and deep web
resources, social and business networking sources along with new economy competitive
and business intelligence resources and an extremely comprehensive listing of new
economy online tools. This has been added to Financial Sources Subject Tracer™
Information Blog. This has been added to Entrepreneurial Resources Subject Tracer™
Information Blog.

PhenX Toolkit
https://www.phenxtoolkit.org/
Use the Toolkit to browse, search and select PhenX Measures for use in genome-wide
association studies (GWAS) or other types of studies. The Measures were selected by
PhenX Working Groups composed of domain experts. For each Measure, the Toolkit has
associated protocol(s), references, and links to resources. Use of PhenX Measures will
help make your study compatible with other studies that also incorporate PhenX
Measures. This has been added to Biological Informatics Subject Tracer™ Information
Blog.

WhichDateWorks - Create Group Plans
http://www.whichdateworks.com/
WhichDateWorks.com was founded on the idea that making plans with friends and
family should be simple, easy and convenient. WhichDateWorks.com was created by
Jason and Joel in their "spare time" after experiencing their own problems and
frustrations trying to make plans with friends. Knowing they weren't alone, they set out to
help make planning easier for everyone. The result is WhichDateWorks.com, a simple,
hassle-free planning solution for all the events in your life. After a long year of building,
testing, updating and tweaking, they are excited to share WhichDateWorks.com with the
world. Plans big and small are now easier than ever with WhichDateWorks.com . This
has been added to the tools section of Research Resources Subject Tracer™ Information
Blog.

Journal of Medicine Use in Developing Countries
http://www.usm.my/dsap/journal/
The Journal particularly welcomes contributions from professionals concerned with
medicine use in developing countries. The core areas of interest of the journal are: 1)
Research in generic medicines, 2) Drug utilization studies, 3)Pharmacovigilance, 4)
Pharmacoeconomics, 5) Issues related to counterfeit medicines, 6) Cross border supply of
illegal medicines, 7) Non-compliance, 8) Qualitative research related to drug use
problems, 9) Patient counseling, 10) Drug information, 11) Drug promotion, 12) Public
health pharmacy, 13) Pharmaceutical policy and management, 14) Pharmacoinformatics,
and 15) Drug use problems in the community. The journal also welcomes any other

relevant areas related to medicine use in developing countries. Papers need to be written in English.

ccMixter - Download, Sample, Cut-up and Share Community Music
http://ccmixter.org/
ccMixter is a community music site featuring remixes licensed under Creative Commons where you can listen to, sample, mash-up, or interact with music in whatever way you want. Remixers ... If you're into sampling, remixing and mash-ups grab the sample packs and a cappellas for download and you can upload your version back into ccMixter, for others to enjoy and re-sample. All legal. Video makers, podcasters and music lovers ... If you're into music, browse this site to hear some of the great remixes people have built from sampling music on this site, all licensed for use under Creative Commons license. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

eHealthcareBot - Your Seach Engine for Healthcare Resources
http://www.eHealthcareBot.com/
eHealthcareBot.com is your search engine for healthcare resources and a Google powered metasearch engine created by the Virtual Private Library™. It is designed to bring together the latest metasearch engines for healthcare on an ongoing basis from the Internet. Currently eHealthcareBot searches over 135 selected healthcare search engines from the Internet with many of them listed below in the resource section. The August 2008 Tracking Report Number 20 **Striking Jump in Consumers Seeking Health Care Information** from the Center for Studying Health System Change is available by clicking here. The **E-Patients: Chronically Ill Seek Health Information Online** by Susannah Fox, Associate Director, Pew Internet & American Life Project August 26, 2008 is available by clicking here. The **Online Health Search 2006** report from the Pew Internet & American Life Project dated October 29, 2006 is available here. Also available from the American Medical Library Association is their report **A User's Guide to Finding and Evaluating Health Information on the Web** and is available by clicking here. The eHealthcareBot.com was a "Featured" niched search engine in the September 15, 2008 Resource Shelf Resources of the Week and is available by clicking here.

Flare Index to Treaties
http://193.62.18.232/dbtw-wpd/textbase/treatysearch.htm
The Flare Index to Treaties is a searchable database of basic information on over 1,500 of the most significant multilateral treaties from 1856 to the present, with details of where the full text of each treaty may be obtained in paper and, if available, electronic form on the Internet. The Index includes only those treaties where there are three or more parties to the instrument. The selection has been based on entries in Multilateral Treaties: index and current status, compiled and annotated within the University of Nottingham Treaty Centre by M.J. Bowman and D.J. Harris (London: Butterworths, 1984, ninth supplement, 1992) - hereafter referred to as Bowman & Harris - and International Legal Materials

(Washington, D.C., American Society of International Law, 1962-). While it would be desirable to create an index to all types of treaty the magnitude of the task may be illustrated by the fact that the World Treaty Index, compiled by Peter H. Rohn (Santa Barbara, California, 1984), covered all treaties signed between 1900 and 1980, yet comprises over 44,000 entries. Clearly, it is beyond the resources of the present project to bring that work up to date, so the Flare Index to Treaties includes only the most significant treaties, conventions and agreements with at least three parties. Bilateral treaties are not included. This has been added to International Trade Resources Subject Tracer™ Information Blog.

Center on Budget and Policy Priorities
http://www.cbpp.org/
The Center on Budget and Policy Priorities is one of the nation's premier policy organizations working at the federal and state levels on fiscal policy and public programs that affect low- and moderate-income families and individuals. The Center conducts research and analysis to help shape public debates over proposed budget and tax policies and to help ensure that policymakers consider the needs of low-income families and individuals in these debates. We also develop policy options to alleviate poverty. In addition, the Center examines the short- and long-term impacts of proposed policies on the health of the economy and the soundness of federal and state budgets. Among the issues we explore are whether federal and state governments are fiscally sound and have sufficient revenue to address critical priorities, both for low-income populations and for the nation as a whole. Over the past quarter-century, the Center has gained a reputation for producing materials that are balanced, authoritative, accessible to non-specialists, and responsive to issues facing the country. Our materials are used by policymakers and non-profit organizations across the political spectrum, and by journalists from a wide variety of TV, radio, print, and online outlets. This has been added to Research Resources Subject Tracer™ Information Blog.

International Journal on Interactive Design and Manufacturing (IJIDeM)
http://www.springer.com/engineering/journal/12008
The International Journal on Interactive Design and Manufacturing (IJIDeM) presents interdisciplinary research, technical issues, and original industrial implementations. It examines the development, handling, and design of highly realistic, multi-sensorial virtual prototypes for improving decision-making in product design and manufacturing. Readers discover cutting-edge research in the fields of mechatronics, design and manufacturing sciences, numerical and mechanical engineering, and virtual reality. IJIDeM explores a variety of techniques, including the description of industrial problems in identifying significant knowledge and variables; advanced modeling of design and manufacturing problems; virtual exploration of solution spaces; building of highly realistic, multi-sensorial simulators; and implementation of user-centered, innovative methods.

Prezi - The Zooming Presentation Editor
http://prezi.com/
Prezi allows anyone who can sketch an idea on a napkin to create and perform stunning non-linear presentations with relations, zooming into details, and adjusting to the time left without the need to skip slides. Create a map of your ideas, images, videos, then show overview, zoom to details, amaze, convince, take the day. And it is very simple to use. The ideology of Prezi is based upon our natural knowledge of how to coordinate ourselves in space; traditionally all information we have had to process and store used to be linked to physical space. That is where our minds have developed good skills in orienting ourselves. Despite all this, digital information today is mostly presented to us as a moniker of printed matter. Of course printing has served us well to store (and shape) information for the the last six centuries, however, with the wide appearance of computing we saw the same old pattern: old forms got translated to new media without exploring its full potential. Most of the computer systems which present us with information today use the old paradigm of prints and slides: arranging information on a framed 2d static space. They could argue that these (at least their forms) are merely the side effect of Gutenberg's galaxy. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

eFinancialBot - Your Global Financial Search Engine
http://www.eFinancialBot.com/
eFinancialBot.com is your search engine for financial resources and a Google powered metasearch engine created by the Virtual Private Library™. It is designed to bring together the latest metasearch engines for financial resources on an ongoing basis from the Internet. Currently eFinancialBot.com searches over 72 selected financial meta search engines and sources simultaneously from the Internet.

iMedisearch - Medical Search Engine of Reputable Resources
http://www.imedisearch.com/
iMedisearch was originally developed as an extension of features of a pharmacist's clinical resources website - RPhWorld. It was developed out of needs to search pharmacists' trusted and reliable online resources without having to go through each of the websites one at a time. The author, a clinical pharmacist, personally tested this new search engine in his practice and found that it returns much more relevant results compared with the traditional Google. The search engine seems to know that the user is a pharmacist by returning results a pharmacist would be interested in such as drug information and continuing education. This engine was shared with colleagues and with other pharmacists on RPhWorld.com. The feedbacks were overwhelmingly positive. These encouraging feedbacks lead to further development of the search module for physicians, then one for patients or the general public, and eventually one for nurses and allied healths. iMedisearch is an independent entity. They are neither funded nor supported by any third party. However, they do collaborate with HON in providing our

users with iMedisearch/HON Toolbar. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

FlexJobs - Find Telecomputing and Telecommute Freelance Jobs
http://www.flexjobs.com/
Their mission is to be the best, most respected, "go to" site for telecommuting, freelance, and online jobs! FlexJobs not only walks the walk and talks the talk (their staff all work from home), but they also spread the love to help others do the same! Their site serves up only the "best of the best", hand-screened, legitimate job opportunities for our users. Anyone who's ever looked for a work from home or telecommute job knows how much junk is out there, and it can take seemingly endless -- and frustrating -- hours to sort through which ones are just scams, ads, or or too-good-to-be-true business opportunities and which ones are really great jobs. So let their trained staff do the extensive, painstaking, and ever-important (due to aggressive online job scams and frauds) research for you! This has been added to Employment Resources Subject Tracer™ Information Blog.

International Journal of Life Cycle Assessment
http://www.springer.com/environment/journal/11367
The International Journal of Life Cycle Assessment (Int J LCA) is the first journal devoted entirely to Life Cycle Assessment. LCA has become a recognized instrument to assess the ecological burdens and impacts connected with products and systems, or, more generally, with human activities. The LCA-Journal - which has been expanded by a section on Life Cycle Management (LCM) - is a forum for scientists developing LCA and LCM; LCA and LCM practitioners; managers concerned with environmental aspects of products; governmental environmental agencies responsible for product quality; scientific and industrial societies involved in LCA development, and ecological institutions and bodies. Coverage includes papers on the improvement and development of LCA methodology; social and political acceptance of LCA; governmental activities + EC, OECD, ISO; examples from industrial applications; historical series; energy analysis; short versions of actual LCAs and case studies.

i-neighbors - Your Neighbohood's Home On the Internet
http://i-neighbors.org/
i-neighbors is a social networking service that connects residents of geographic neighborhoods.. Unlike websites that encourage global, national, or city-wide communication, i-neighbors links members of local neighborhoods as defined by the people that create them. i-neighbors helps individuals, communities, and homeowner's associations build social capital by providing a place for neighbors to find each other, organize, share information and work together to address local problems. Their goal is to help people create neighborhoods that are safer, better informed, more trusting, and better equipped to deal with local issues. Founded in 2004 as a not-for-profit, advertising, and SPAM free service, i-neighbors now supports thousands of neighborhoods in all 50 of the United States and all 10 Canadian provinces. i-neighbors is operated as an ongoing

experiment in community building by a team of faculty and students headed by Prof. Keith Hampton at the Annenberg School for Communication at the University of Pennsylvania. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Trace™ Information Blog.

eMarketingBot - Your Search Engine for Marketing Resources
http://www.eMarketingBot.com/
eMarketingBot.com is your search engine for marketing resources and a Google powered metasearch engine created by the Virtual Private Library™. It is designed to bring together the latest metasearch engines for marketing on an ongoing basis from the Internet. Currently eMarketingBot searches over 40 selected marketing meta search engines and sources from the Internet.

MX Lookup Tool - Check Your DNS MX Records Online
http://www.mxtoolbox.com/
This test will list MX records for a domain in priority order. The MX lookup is done directly against the domain's authoritative name server, so changes to MX Records should show up instantly. You can click Diagnostics, which will connect to the mail server, verify reverse DNS records, perform a simple Open Relay check and measure response time performance. You may also check each MX record (IP Address) against 147DNS based blacklists. (Commonly called RBLs, DNSBLs). This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

CometDocs - Free Online File Conversion
http://www.cometdocs.com/index.htm
Cometdocs currently offers over 50 online conversions. They handle many different types of file conversions. Check their list at the end of the FAQ to get the full details of each conversion type they offer. They offer a true document conversion service that is free for users who sign up. Their top quality conversion output is found nowhere else. They also provide truly unique features, such as the ability to convert scanned PDF and Tiff documents. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

International Journal of Communication Networks and Information Security (IJCNIS)
http://ijcnis.kust.edu.pk/
International Journal of Communication Networks and Information Security (IJCNIS) is a scholarly peer reviewed international scientific journal published two times in a year, focusing on theories, methods, and applications in networks and information security. It provides a challenging forum for researchers, industrial professionals,

engineers, managers, and policy makers working in the field to contribute and disseminate innovative new work on networks and information security. The topics covered by this journal include, but not limited to, the following topics:

* Network Technologies
* Networks Applications and Services
* Network Architecture and Design
* Wireless Communications & Networking
* Wireless Ad Hoc and Sensor Networks
* Next Generation Networks
* Next Generation Mobile Networks
* Communication Protocols
* Information and Network Security
* Reliability and Performance Modeling
* LAN, MAN, WAN, Internet
* Optical Systems and Networks
* Multimedia Communications
* Broadband Networks IEEE 802.11 WLAN, IEEE 802.16 WiMAX, and Wireless Mesh
* Networks
* Cellular and 3G Networks
* Bluetooth, IrDA, RFID
* Authentication, authorization, access control and data protection
* Network forensics
* Information warfare and cyber-terrorism
* Security models and architectures
* Risk analysis and risk management
* Security mechanisms for broadband networks
* Securing sensor and ad hoc networks

Content in English.

ContactHelp - Directory of Phone Numbers of Customer Service and Customer Support
http://contacthelp.com/
ContactHelp.com is a free, user-maintained resource providing fast access to the customer service information that is too often only found out the hard way. They provide phone numbers, shortcuts to reach live human beings, multiple departments for many listing, direct links to corporate customer service, options to add user comments, ratings and even uploading of phone call recordings. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

eCouponBot - Find Online Coupons and Discount Codes
http://www.eCouponBot.com/
eCouponBot.com is your search engine for online coupons and discount codes and a Google powered metasearch engine created by the Virtual Private Library™. It is designed to bring together the latest metasearch engines and directories for online coupon and discount codes on an ongoing basis from the Internet. Currently eCouponBot.com searches over 114 selected online shopping coupon and discount code meta search engines and sources simultaneously from the Internet.

TagCloud - Create Your Own TagCloud From Any Text
http://tagcrowd.com/
TagCrowd is a web application for visualizing word frequencies in any user-supplied text by creating what is popularly known as a tag cloud or text cloud. It was created by Daniel Steinbock, a doctoral student in Design and Education at Stanford University. Today, text clouds are primarily used for navigation and visualization on Web 2.0 sites that employ user-generated metadata (tags) as a categorization scheme. (Flickr is a good example.) TagCrowd is doing something different. When you look at a text cloud, you see not only an informative, beautiful image that communicates much in a single glance, you see a whole new perspective on text. TagCrowd is taking tag clouds far beyond their original function: a) as topic summaries for speeches and written works, b) as blog tool or website analysis for search engine optimization (SEO), c) for visual analysis of survey data, d) as brand clouds that let companies see how they are perceived by the world, e) for data mining a text corpus, f) for helping writers and students reflect on their work, g) as name tags for conferences, cocktail parties or wherever new collaborations start, h) as resumes in a single glance, and i) as visual poetry. The list goes on and continues to grow. In the future, TagCrowd will develop into a suite of experimental tools and tutorials that empower social and collaborative uses for text clouds and related visualizations. Their mission is to push the innovation envelope in online and face-to-face communities of all stripes. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Keyboard Shortcut List - Using Shortcut Keys To Improve Productivity
http://www.shortcutworld.com/
With the keyboard as exclusive input device, everybody worked at peak productiveness entering data. Even new employees got up to speed using the right keyboard shortcuts within a couple of days. Today, individual productivity in human-computer interaction is devastating. There is no question that the mouse was the single biggest failure to individual productivity in recent computer history. In today's global world, people are competing in who is the most productive. Individual human productivity really does matter since it is human productivity that enriches the world. A keyboard shortcut (also known as an accelerator key, shortcut key, or hotkey) is one or a set of keyboard keys that, when pressed simultaneously, perform a predefined task. Such a task could be done with the computer's pointing device, but would require the user to take his or her hands off of the keyboard, and then place them on said device. Hence, they are a shortcut in that

they save the user time. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

International Economics and Economic Policy
http://www.springer.com/economics/international+economics/journal/10368
The Journal International Economics and Economic Policy focuses on contributions that are relevant to economic policy, publishing both theoretical and empirical papers. In particular, the journal focuses on comparative economic policy; international political economy, including international organizations and policy cooperation; monetary and real/technological dynamics in open economies; globalization and regional integration; trade; migration; international investment; internet commerce; and regulation. This journal features contributions from the economic policy community and serves as a forum for dialogue and exchange between academics and policymakers. This has been added to International Trade Resources Subject Tracer™ Information Blog.

One2OneResearch - Expert Market Reseach and Analysis
http://www.one2oneresearch.com/
One2OneResearch is a unique online portal that brings together information professionals and information seekers. They offer a simple, fast, and reliable means to find free as well as reasonably priced information, and qualified professionals for customized queries — all within budget. The site caters to anyone who is seeking information and advice for his or her business, investment, research paper, thesis, projects. While information seekers benefit from getting access to a host of services at an affordable cost, information professionals — independent researchers as well as research & consulting companies — benefit from gaining access to a number of tools through which they can offer and promote their products & services. It's a "Marketplace of Ideas, Information & Insight" that benefits all participants. This has been added to Internet Experts Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer&trade' Information Blog. This has been added to Research Resources Subject Tracer™ Information Blog.

Know Your Stuff™ - Free Home Inventory Software
http://www.knowyourstuff.org/
Know Your Stuff™ is the Insurance Information Institute's online home inventory software. This application makes creating and updating your home inventory easy. And with their free, secure online storage you will have access to your inventory anywhere, any time. You never know when a disaster may strike - but you can be prepared with a home inventory. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Green America - National Green Pages
http://www.coopamerica.org/
Green America is a not-for-profit membership organization founded in 1982. (They went by the name "Co-op America" until January 1, 2009.) Their mission is to harness economic power—the strength of consumers, investors, businesses, and the marketplace—to create a socially just and environmentally sustainable society. They work for a world where all people have enough, where all communities are healthy and safe, and where the bounty of the Earth is preserved for all the generations to come. What Makes Green America Unique: a) They focus on economic strategies—economic action to solve social and environmental problems; b) They mobilize people in their economic roles—as consumers, investors, workers, business leaders; c) They empower people to take personal and collective action; d) They work on issues of social justice and environmental responsibility; e) They see these issues as completely linked in the quest for a sustainable world. It's what we mean when we say "green"; and f) They work to stop abusive practices and to create healthy, just and sustainable practices. This has been added to Green Files Subject Tracer™ Information Blog.

Agriculture in the European Union: Statistical and Economic Information
http://ec.europa.eu/agriculture/agrista/index_en.htm
Agriculture in the European Union is an annual publication that covers a wide range of subjects: the economic situation in agriculture, structures, trade, markets, financial aspects and rural development. Content freely accessible in PDF format in English, German and French. This has been added to Agriculture Resources Subject Tracer™ Information Blog.

Cazoodle - Search, Integrate, and Organize -- The Real World
http://www.cazoodle.com/products.php
Search, integrate, and organize-- the real world. Cazoodle Inc., established in August 2006, as a startup company from the University of Illinois at Urbana-Champaign (UIUC), aims to enable "data-aware" search-- to access the vast amount of structured information beyond the reach of current search engines. The company is co-founded by Prof. Kevin C. Chang and his research team of graduate and undergraduate students, with the support of the University and technology transfer from the MetaQuerier research at UIUC. Cazoodle is located at EnterpriseWorks, an incubator facility of the University, on the Research Park of UIUC in Champaign, Illinois. With the mission of providing semantic data-aware search, Cazoodle is focusing on the pressing demands of building "vertical," or domain specialized, search services. Cazoodle has general platform technologies for supporting intelligent vertical search for virtually every domain, using which Cazoodle is building services in selected domains. As their screencast explains, Cazoodle's semantic search technology can enable much better vertical search---way bigger, much deeper, and available everywhere. Cazoodle provides effective access to structured information on the Internet. While current search engines index pages only as unstructured documents by keywords, the Web has continually grown with a large amount of structured data, in every domain (e.g., hotel, airfare, real estate, products) of our information needs.

Cazoodle develops intelligent crawling and indexing technologies to realize large scale search and integration, over both the surface Web and the deep Web. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Deep Web Research Subject Tracer™ Information Blog.

Space Exploration
http://adc.gsfc.nasa.gov/adc/education/space_ex/index.html
This site is a concise yet comprehensive overview of the immense and expanding field of space exploration. Providing a combination of historical and functional information, this survey should unravel any mysteries that may impede your understanding of space exploration. With this site, you should be able to find answers to a large array of questions, such as: who was the first man in space? What is the most powerful rocket? What makes a rocket scientist? What was the purpose of the Galileo program? Are we alone in the universe? Feel free to surf this site for your interests, and I am sure if you do not have any now, you will find some. Now enjoy! This has been added to Astronomy Resources Subject Tracer™ Information Blog.

Public Records Tracker - Web Based Public Records Request Management Solution
http://www.publicrecordstracker.com/
Public Records Tracker powered by Microsoft Dynamics CRM makes it easy for state, local, and federal government organizations to track, organize, and automate their responses to public records requests (both FOIA and state PRA requests.) Public Records Tracker is 100% web-based so there's no need to download or install any software. Also, Public Records Tracker generates the key reports required for FOIA annual reporting compliance. In short, Public Records Tracker is all you need to manage public records requests. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Computing: Archives for Scientific Computing
http://www.springer.com/springerwiennewyork/mathematics/journal/607
Computing presents the latest research results from computer science and numerical computation. Each issue features original papers and short communications from a wide range of areas, including: discrete algorithms, symbolic computation, performance and complexity evaluation, operating systems, scheduling, software engineering, picture processing, parallel computation, classical numerical analysis, numerical software, numerical statistics, optimization, computer arithmetic, efficient algorithms for large-scale problems, plotting, computer architecture, and graphics. With an emphasis on computational relevance and scientific computing, the journal is ideal for professionals and students in all fields of scientific computing, for computer center staff, and software and hardware manufacturers.

Reflect: Automated Annotation of Scientific Terms of Proteins and Small Molecules
http://reflect.ws/
Reflect is a new service able to recognise proteins and small molecules mentioned in a web page, and link them to information-rich summaries. Simply by pressing a button on your browser, or typing a url in the Reflect's web page, the new service will automatically add hyperlinks to the names of proteins and small molecules. Clicking on an annotated element, displays a pop-up window that gives information about the term, and allows the user to quickly link to more detailed information. For each protein or gene, Reflect provides domain structure, subcellular localization, 3D structure, and interaction partners. For small molecules, Reflect provides the chemical structure and interaction partners. Reflect has three user interfaces: a standard web page, and plug-ins for Firefox and Internet Explorer. The interfaces were constructed using HTML, JavaScript, XMLbased User Interface Language (XUL), and Document Object Model (DOM) events. Communication between browser and server is via XMLHttpRequest objects. HTML documents are sent to the server, which uses regular expressions to distinguish plain text from HTML markup. Substitutions occur only at the free text portion of an HTML page. The text of existing hyperlinks is excluded from the annotation. The text of each document is first parsed for organism names, then parsed again for protein names associated with the organisms found in the first parse, or with a default organism set by the user. Recognized gene, protein, or small molecule names are substituted with hyperlinks that generates a summary popup using overLib (http://overlib.boughner.us). The document is returned to the browser with previous HTML tags and their attributes unaffected, hence preserving the original document format. The core component of Reflect is a consolidated dictionary that links names and synonyms to source data entries. It was created by merging the STRING (http://string.embl.de) and STITCH (http://stitch.embl.de) databases, and it currently contains over 1.5 million proteins from 373 organisms and 4.3 million small molecules. The entire 18 GB dictionary is kept in RAM to enable fast tagging. This has been added to Biological Informatics Subject Tracer™ Information Blog.

Libraries & Archives in South Asia (LASA)
https://coral.uchicago.edu/display/lasa/Home
The Libraries & Archives in South Asia (LASA) wiki is a collaborative effort to compile a guide to South Asian libraries and archives for academics and researchers in the humanities and social sciences. The LASA wiki contains detailed information about libraries and archives in Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka. It aims to become a full-fledged portal to research in South Asia, for the scholarly community and by the scholarly community. Every entry in the wiki can be improved upon with new or updated information. A typical entry contains location, contact information, basic access and collection information and a link to the institution's website when it is available. More detailed information, including maps, photographs, links to online catalogs, etc. are provided when available. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

2009 National Trade Estimate Report on Foreign Trade Barriers
http://snipurl.com/fy0am
The 2009 National Trade Estimate Report on Foreign Trade Barriers (NTE) is the twenty-first in an annual series that surveys significant foreign barriers to U.S. exports. The report provides, where feasible, quantitative estimates of the impact of these foreign practices on the value of U.S. exports. Information is also included on actions taken to eliminate barriers. This has been added to International Trade Resources Subject Tracer™ Information Blog.

Open Applied Physics Journal
http://www.bentham.org/open/toapj/
The Open Applied Physics Journal is an Open Access online journal which publishes research articles, reviews and letters in all areas of applied physics. The journal will cover both experimental and theoretical applications of physics to all branches of science. The Open Applied Physics Journal is a peer-reviewed journal which aims to provide the most complete and reliable source of information on current developments in applied physics. The emphasis will be on publishing quality papers rapidly and freely available to researchers worldwide.

BlueServo Virtual Community Watch - Fighting Border Crime
http://blueservo.net/
The Texas Border Sheriff's Coalition (TBSC) has joined BlueServo(sm) in a public-private partnership to deploy the Virtual Community Watch, an innovative real-time surveillance program designed to empower the public to proactively participate in fighting border crime. The TBSC BlueServoSM Virtual Community WatchSM is a network of cameras and sensors along the Texas-Mexico border that feeds live streaming video to www.BlueServo.net. Users will log in to the BlueServoSM website and directly monitor suspicious criminal activity along the border via this virtual fence(sm). This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

Trexy Search Engine - Blaze Search Trails
http://trexy.com/
Trexy enables you to remember your searches and the web pages you visit while searching on over 4,000 Internet search engines. Share your trails with other Trexy users and also follow the anonymous search trails of others. Find new information on the web and help build a universal searching memory. This can be done by downloading the Trailbar/Trailbutton. Trexy automatically remembers your searches and the web pages you visit online by creating search trails. Trexy users can quickly retrieve their previous searches and the web pages they have found before, saving time and effort. Blazing a search trail means you'll never have to ask yourself, "where did I find that again?" Users can also follow the anonymous search trails of other Trexy users, or as we call them, "trailblazers," to quickly pinpoint information without having to do all the searching themselves. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

HealthMap - Global Disease Alert Mapping System
http://healthmap.org/
HealthMap brings together disparate data sources to achieve a unified and comprehensive view of the current global state of infectious diseases and their effect on human and animal health. This freely available Web site integrates outbreak data of varying reliability, ranging from news sources (such as Google News) to curated personal accounts (such as ProMED) to validated official alerts (such as World Health Organization). Through an automated text processing system, the data is aggregated by disease and displayed by location for user-friendly access to the original alert. HealthMap provides a jumping-off point for real-time information on emerging infectious diseases and has particular interest for public health officials and international travelers. This has been added to Healthcare Resources Subject Tracer™ Information Blog.

Integrative Biology
http://www.rsc.org/Publishing/Journals/ib/Index.asp
Integrative Biology publishes novel biological research, based on innovative experimental and theoretical methodologies, that enhances our capability to gain new insight into important biological questions. In particular, the journal welcomes submissions that contribute to quantitative understanding of how component properties at one level in the dimensional scale (nano to macro) determine biosystem behaviour at a higher level of complexity. Such research is typically multi- or inter-disciplinary, calling upon expertise and technologies from the physical sciences, engineering, computation and mathematics. It can also extend to synthetic systems, whether used to elucidate fundamental principles of biological function or in applications. Topics include:

* Biochemical gradients to study migration and chemotaxis
* Devices/systems that recapitulate in-vivo structure/function
* Engineered/synthetic micro and nanoenvironments to understand cell-matrix signalling
* Micro and nanofluidics to study mammalian cells
* Nanofluidics to study polymer properties (protein structure/function, DNA replication repair)
* Integrative modelling of molecular, cellular or tissue processes
* Devices and technologies for screening, diagnosing, and monitoring disease
* Cell sub-type identification/measurement
* Nanotechnologies, devices and systems for exploring and elucidating biological systems
* Synthetic biology
* Design and re-engineering of biological systems
* Prediction of dynamic behaviour and effectiveness of drugs
* Systems to monitor and optimise therapeutics in vivo
* High-throughput approaches for systems biology
* New miniaturised platforms for elucidating biological events and processes
* Biomimetic systems
* Quantitative models of cell/cell communication

* Quantification of extracellular analytes related to cellular processes
* Biological phenomena and processes at the nanoscale
* Validation of novel technologies against current "standards/tradition"
* Single cells - metabolic systems and mechanisms
* Metabolism of cells, proteins, amines, tissues, antibodies etc.

Emurse - Resume Builder
http://www.emurse.com/
Create, share and store your resume online for free. Creating a quality resume is a
difficult task. Keeping track of your various versions is a hassle. Once you have it all
figured out, there's the worry of formats, hard drive failure and viruses. Emurse allows
you to focus on what's most important — writing quality content and selling yourself.

MacRAE's BLUE BOOK
http://www.macraesbluebook.com/
MacRAE'S BLUE BOOK is one of the world's key sourcing tools for North American
industrial products and performs almost 5 million industrial searches monthly for nearly 2
million unique users. America's original industrial directory since 1893, MacRAE'S is
where today's industrial buyers go to find the exact product or service they need, when
they need it. Using its powerful search features, users unlock the power of MacRAE'S by
instantly accessing information on over 500,000 North American industrial companies
with more than 2 million product listings indexed under more than 50,000 product
headings. This has been addded to the tools section of Research Resources Subject
Tracer™ Information Blog. This has been added to Business Intelligence Resources
Subject Tracer™ Information Blog.

Economic Crisis in European Union
http://www.nrc.nl/international/article2160480.ece
How is the economic crisis affecting the European Union? This map shows the figures
for all the member states by year and quarter and lets you compare budget deficit,
unemployment rate, national debt and economic contraction. This has been added to
Research Resources Subject Tracer™ Information Blog.

SAE International Journal of Aerospace
http://saeaero.saejournals.org/
The journal publishes peer reviewed cutting-edge technical papers spanning all aspects of
aerospace including: avionics, environment, flight sciences, operations, maintenance,
fastening, assembly, tooling, manufacturing, materials and structures, power, propulsion,
safety, vehicle systems, systems engineering, unmanned aerial vehicles and space
environmental systems. In addition to being identified as some of the best published work
at SAE International, these papers as a set have long-term reference to the engineering
community and to society at-large.

NYC Stimulus Tracker
http://www.nyc.gov/html/ops/nycstim/html/tracker/tracker.shtml
With the NYCStat Stimulus Tracker, New Yorkers can track the City's use of federal stimulus/recovery funds provided through the American Recovery and Reinvestment Act of 2009 (ARRA). This funding includes federal tax cuts, expansion of unemployment benefits and other social welfare provisions, and domestic spending in education, health care, energy efficiency and infrastructure. The stimulus money for New York City will be used to ensure continued vital City services, provide assistance to New Yorkers in need, and stimulate the City's economy. This has been added to New Economy Analytics, Resources and Alerts Subject Tracer™ Information Blog.

IDEAS: Economics and Finance Research
http://ideas.repec.org/
Billed as the "largest bibliographic database dedicated to economics", the Internet Documents In Economics Access Services (IDEAS) database contains over 700,000 citations, including links to working papers, articles, chapters, and books. The database is housed at the University of Connecticut, and it is overseen by Christian Zimmermann and a number of his colleagues. A handy table on the site's homepage gives some basic statistics on what users can find here, and they should feel free to perform a detailed search on anything from agricultural economics to supply chains. Moving down the site, there's a listing of institutions which have recently joined the IDEAS database and a section titled "How to get papers listed", which might helpful for aspiring economists and other types. Additionally, visitors can read through their FAQ section and they shouldn't leave without looking at their two informative weblogs. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Academic and Scholar Search Engines and Sources White Paper. [From The Scout Report, Copyright Internet Scout 1994-2009. http://scout.wisc.edu/

Canadian Journalism Project (CJP)
http://www.j-source.ca/
The Canadian Journalism Project (CJP) and its websites, J-Source.ca (English) and ProjetJ.ca (French), are projects of The Canadian Journalism Foundation in collaboration with leading journalism schools and organizations across Canada. Their goal is to enable a national conversation about the achievement of, and challenges to, excellence in Canadian journalism and provide a convenient and trustworthy source of information and commentary. The site provides a source for news, research, commentary, advice, discussion and resources. It also includes an expanding database of award-winning journalism, and links to other organizations that recognize and support excellence in journalism. J-Source and ProjetJ will always be works in progress. This has been added to Journalism Resources Subject Tracer™ Information Blog.

Open Catalysis Journal
http://www.bentham.org/open/tocatj/
The Open Catalysis Journal is an open access online journal, which publishes research articles, reviews, and letters in all areas of catalysis science, including heterogeneous, homogeneous catalysis as well as biocatalysis. The Open Catalysis Journal is a peer-reviewed journal, aims to provide the most complete and reliable source of information on current developments in the field. The emphasis will be on publishing quality papers rapidly and freely available to researchers worldwide.

Chartle - Interactive Charts Online
http://www.chartle.net/
Over 1 billion charts, maps, plots and diagrams are found in print publications each year - but only 40 million online. This huge discrepancy is a reflection of the complexity to create & publish charts online. Chartle.net tears down the complexity of online visualizations - offers simplicity, ubiquity and interactivity instead. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

June 2009 Zillman Column - ChatterBots Sites and Resources
http://columns.virtualprivatelibrary.net/ChatterBots_June09_Column.pdf
http://www.zillmancolumns.com/
http://www.ChatterBots.info/
The June 2009 Zillman Column is now available and is titled **ChatterBots Sites and Resources**. This June 2009 column is a comprehensive list of resources and sites that give you the latest and most important information concerning chatterbots sites and resources that are available over the Internet. These sites and resources allow you to chat with ChatterBots using your computer, netbook, cell phone, or mobile device! Chat via text messaging, chat by typing or even talking with many of the ChatBots that are available freely over the Internet. The original ChatBot Eliza goes back to 1960's and is still available! Todays ChatBots have artificial intelligence and really can amaze you! Enjoy this list of ChatterBots resources …. Download this excellent freely available 15 page .pdf (749KB) column today!

MetaGrid - Find 8000 Newspapers and Online-magazines
http://www.metagrid.com/
Metagrid is the editoral maintained catalog for online publications newspapers and online magazine available over the Internet. You can search for newspapers and magazines worldwide. Journal of Media Sociology
http://www.marquettejournals.org/mediasociology.html
This peer-reviewed scientific journal publishes theoretical and empirical papers and essays and book reviews that advance an understanding of the role and function (and dysfunctions) of mass media and mass communication in society or the world. Submissions must have a sociological focus, which means a focus on culture, social interaction, social structure, institutions and/or organizations. Both micro and macro perspectives are welcomed, as are all theoretical and methodological perspectives.

Trendrr - Track, Compare and Share Data Free
http://www.trendrr.com/
Track, compare and share data, free. Identify trends across social graphs and networks, realize the potential of p2p, track engagement metrics, look at what is really happening, real time. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

CABI - CAB International - Knowledge for Agriculture and the Environment
http://www.cabi.org/
CABI is a not-for-profit science-based development and information organization. CABI is the trading name of CAB International. CABI provides scientific expertise and information on agriculture and the environment. CABI can trace its origins back to 1910. Starting as a small entomological service for commonwealth countries, CABI soon developed into a truly international service in agricultural information, pest identification and biocontrol. CABI's mission is to improve people's lives worldwide by providing information and applying scientific expertise to solve problems in agriculture and the environment. At any one time CABI is working in more than 70 countries. CABI operates as an efficient organization so as to be financially self-sustaining whilst delivering benefits to its members through not-for-profit development projects. This has

been added to Agriculture Resources Subject Tracer™ Information Blog. This has been added to Green Files Subject Tracer™ Information Blog.

Doorbell - Sales Software for Non-Sales People
http://getdoorbell.com/index.html
Doorbell is simple, web-based sales software that helps you and your team to win more business while you're busy with projects that pay the bills. Seamlessly manage contacts, tasks and business opportunities without getting distracted from your actual job. Doorbell does the rest to make sure that nothing falls through the cracks ever again. Pushy marketing and sales makes you look desperate. People buy based on needs, relationships and trust. Doorbell helps you grow client connections the healthy way. SmibsNet is changing how business works: Finding great talent, connecting online and collaborating right within the network is just a few clicks away. No more logging into 15 accounts to find out what you're supposed to do today. Your Smibs lounge accumulates tasks and messages from ALL the companies you are involved with. Doorbell helps you: 1) Check who you need to follow up with today; 2) Review your team members notes on a contact; 3) See all of your sales related tasks this week; 4) Schedule a call to follow up on the quote you've sent; 5) Enter new contacts from last nights networking event; 6) Catch up on the status of an opportunity including all contacts, tasks, notes and files involved; 7) Import, export and backup contacts at any time; and 8) Organize people and companies by groups. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Biopolymers and Cell (B&C)
http://www.biopolymers.org.ua/
Biopolymers and Cell (B&C) is a multitopical journal publishing original works of fundamental and applied character, short communications, and review articles in molecular biology and related areas (structure and function of biopolymers, their participation in submolecular structures formation, genome regulation and molecular mechanisms of differentiation, oncogenesis, cell-virus interaction, biotechnology, etc.). B&C is issued bimonthly, one volume per year, and contains the following sections:

* Structure and Function of Biopolymers
* Cell Biology
* Genome and Its Regulation
* Molecular Mechanisms of Differentiation
* Viruses and Cell
* Gene-Engineering Biotechnology
* Reviews
* Discussions
* Short Communications

The papers are published in the Ukrainian, Russian and English languages in a printed version and in English language in an electronic version.

Stimulus and Recovery Feeds
http://isd.ischool.berkeley.edu/stimulus/feeds/feeds.html
Stimulus Feeds is prepared and hosted by the Information and Service Design Program (ISD) of UC Berkeley's School of Information. This is the complete list of feeds currently provided by Agency Recovery Sites themselves. This table groups these feeds by agency, and then by feed type. In addition to these agency-maintained feeds, the Stimulus Feeds site provides feeds for all weekly reports published on recovery.gov (republishing the Excel data as XML and XHTML); these feeds are available in the Scraped Data column. Each of the agency feeds can be tested for validity (i.e., whether it is a correct feed) by simply pressing the validate link following the feed URI. This has been added to New Economy Analytics, Resources and Alerts Subject Tracer™ Information Blog.

Movavi Video Converter
http://www.movavi.com/videoconverter/
Movavi Video Converter is a groundbreaking video format converter you can use to convert video & DVD files. Convert video. Rip video. Save in iPod, iPhone, PSP, PDA, cell phone formats. Do it all with this powerful video file converter. With this incredible video file converter you can: 1) Convert video & unprotected DVDs into any formats, including the latest ones; 2) Rip videos and DVDs to watch them on any portable device: iPod, iPhone, PSP, PDA, Zune, Archos, BlackBerry, cell phones, and more; 3) Convert video to and from HD formats without limitations; 4) Specify quality level and file size of output video with a single click within your video converter software; 5) Fine-tune any output format settings in the video converter's Advanced mode; 6) Improve video quality, tweak your video with unique editing tools; and 7) Save your time when you either convert videos or rip videos with our ultra high-performance video converting technology. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Collective Intellect - Real Time Market Intelligence
http://www.collectiveintellect.com/
Collective Intellect provides real time marketing intelligence to help marketing professionals listen and respond to what consumers are saying about their brands online to maximize their ROI. Using their proprietary analytics engine that instantaneously sifts through and analyzes the millions of consumer conversations occurring online everyday, Collective Intellect provides real time consumer insight about your company, industry, brands and competitors. Additionally, Collective Intellect gives you immediate access to the consumer insight data you need to gain complete visibility and control over your marketing campaigns to ensure your messages are being heard authentically and accurately. Collective Intellect delivers richer, actionable, marketing insights faster and more cost effectively than traditional market research methods. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Cancer Genomics & Proteomics (CGP)
http://cgp.iiarjournals.org
Cancer Genomics & Proteomics (CGP) is an international journal designed to publish rapidly high quality articles and reviews on the application of genomic and proteomic technology to basic, experimental and clinical cancer research. Cancer Genomics & Proteomics (CGP) welcomes the submission of original high quality articles and reviews on the application of genomic and proteomic technology to basic, experimental and clinical cancer research. The journal's topical spectrum includes: (a) Molecular causes of carcinogenesis, cancer progression and metastasis; (b) Structural and functional aspects of genes in the cancer cell; (c) Advances in genomic and proteomic technologies applicable to cancer research; (d) Rational anticancer drug design and drug development. CGP will also accept abstracts and proceedings of scientific meetings for publication, following consideration and approval by the Editorial Board.

The Manuals - Free Manuals Online
http://the-manuals.com/
This site offer a search engine for free online manuals with 5,770,000 manuals available per their home page. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Reference Resources Subject Tracer™ Information Blog.

Review Centre - Read Consumer Reviews and Price Comparisons on Thousands of Products and Services
http://www.reviewcentre.com/
Reviewcentre.com offer real consumer reviews and insight regarding products and services for more informed comparison shopping. Review Centre, over the last ten years, have grown to become one of the UK's (and now U.S) most trusted review sites. It's all about delivering knowledge and insight to consumers through the provision of honest, impartial and in-depth product and service information generated by it's users. Indeed, it's their community of reviewers that empower consumers to make informed purchasing decisions. They are passionate about this rapidly growing sector which is driven by consumer demand for real information from real people. This has been added to ShoppingBots and Online Shopping Resources 2009 Subject Tracer™ Information Blog.

Writeboard - Collaborative Online Writing
http://www.writeboard.com/
Writeboards are sharable, web-based text documents that let you save every edit, roll back to any version, and easily compare changes. Use Writeboard to write solo or collaborate with others. Writeboard makes it easy to: 1) Write without fear of losing or overwriting a good idea; 2) Compare different versions of a document; 3) Collaborate with colleagues on copy, proposals, memos, etc.; 4) Subscribe to documents via RSS and be notified of changes; and 5) Keep your writings organized with Backpack integration. Writeboard is perfect for: a) Authors, journalists, PR folks, editors, and publishers; b) Bloggers or freelance/independent writers; c) Letter writers, songwriters, poets,

comedians, creatives; and d) Students, professors, and groups collaborating on a paper. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Student Research Resources Subject Tracer™ Information Blog.

LIBER Quarterly: the Journal of European Research Libraries
http://liber.library.uu.nl/index.html
LIBER represents and promotes the interests of research libraries in Europe. The overall aim is to assist research libraries in Europe to support a functional network across national boundaries in order to ensure the preservation of the European cultural heritage, to improve access to collections in European research libraries, and to provide more efficient information services in Europe. To achieve this aim, among other activities, LIBER:

* represents the interests of European research libraries (especially national and university libraries);

* seeks to identify and define the needs for common effort and initiates activities in these areas, either alone or in co-operation with other organizations;

* supports the improvement of professional skills in research libraries through meetings, seminars, working groups, and publications. It supports special projects and development schemes;

* promotes standardizations in areas vital for co-operations among libraries, such as library automation;

* plays an active role in shaping a long-term vision for the development of a European research library network, while representing the collective expertise of its member libraries.

The Quarterly of the Ligue des Bibliothèques Européennes de Recherche (LIBER Quarterly), covers all aspects of research librarianship: preservation, bibliographic control, document supply, library management, data processing, networking, digitisation, library architecture, etc. Special attention is given to library cooperation in Europe and to the comparative approach to librarianship.

SitePoint - New Articles and Fresh Thinking for Web Designers and Developers
http://www.sitepoint.com/
SitePoint - SitePoint is a fast growing online media company and information provider targeting the Web professional market, specifically Web Developers and Designers. The company has five major revenue streams: advertising and sponsorship, content-based products both online and in retail, software, and more recently streaming video

subscriptions and classified listings. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

E-Democracy and E-Government Researchers Network
http://groups.dowire.org/groups/research
E-Democracy and E-Government Researchers Network is an online group for Democracies Online. The purpose of E-Democracy and E-Government Researchers Network is to connect e-democracy and e-government researchers around the world. This has been added to Research Resources Subject Tracer™ Information Blog.

Lexxe: Search Engines That Answers Exact Queries
http://www.lexxe.com/
Founded in 2005, Lexxe Pty Ltd developed a third generation Internet search engine with advanced Natural Language Processing technologies. Thier initial research and development of the search engine dates back to October 2004, with the help of a number of supportive individuals. Lexxe is based in Sydney, Australia. "Lexxe", /leksI/ or pronounced 'leksi', our company name, is derived from a linguistic term "Lexical", which means "related to words". It emphasises the processing of language from the level of words and the meanings associated with them, which is a core issue for Lexxe. Lexxe has been exploring more intelligent ways to find information for users in a more meaningful way. They believe this method will eventually bring far more accurate and relevant search results than the current search technology. Their technology is built upon the foundation of advanced Natural Language Processing technology. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Journal of Materials Engineering and Performance (JMEP)
http://www.springerlink.com/content/120454/
The Journal of Materials Engineering and Performance (JMEP) offers articles that assist in solving day-to-day engineering challenges, especially those involving components for larger systems. Coverage includes all aspects of materials selection, design, processing characterization and evaluation. Topics include improvement of materials properties through processes and process control of casting, forming, heat treating, surface modification and coating, and fabrication. Testing and characterization are demonstrated through mechanical and physical tests, NDE, metallography, failure analysis, corrosion resistance, chemical analysis, surface characterization, and microanalysis of surfaces, features and fractures. The Journal of Materials Engineering and Performance publishes contributions on all aspects of materials selection, design, processing, characterization, and evaluation. The scope includes all materials used in engineering applications, especially those that typically result in components for larger systems. This is a publication of ASM International, The Materials Information Society.

AlternativeTo - Alternates to Windows, Mac, Linux, and Online Applications
http://alternativeto.net/
AlternativeTo is a new approach to finding good software. Tell them what application you want to replace and they give you suggestions on great alternatives! Instead of listing thousands of more applications in a category, they make each application into a category. Think of it like forever evolving blog posts about good alternatives to the software that you're not satisfied with. And the "blog posts" are generated by you through suggestions, comments and votes. This has been added to World Wide Web Reference Subject Tracer™ Information Blog.

TINET - Tourism Research Information Network
http://www.tim.hawaii.edu/timlistserv/about_trinet.aspx
TRINET is an electronic bulletin board which serves as a means to connect the international tourism research and education community. Its purpose is to promote an exchange of information relevant to tourism research and to create a place for open debate on issues related to tourism research and education. This has been added to Research Resources Subject Tracer™ Information Blog.

New Found Press - A Digital Imprint of the University of Tennessee Libraries
http://www.lib.utk.edu/newfoundpress/
Today's scholarly publishing environment presents a strategic opportunity for academic libraries to expand their role in the publications process. Universities are both creators and consumers in the information economy. A digital library press offers the potential for making scholarly and specialized resources widely available at a reasonable cost. The University of Tennessee Libraries is developing a framework to make scholarly and specialized works available worldwide. Newfound Press, the University Libraries digital imprint, advances the community of learning by experimenting with effective and open systems of scholarly communication. Drawing on the resources that the university has invested in digital library development, Newfound Press collaborates with authors and researchers to bring new forms of publication to an expanding scholarly universe. They consider manuscripts in all disciplines, encompassing scientific research, humanistic scholarship, and artistic creation. This has been added to Research Resources Subject Tracer™ Information Blog. This has been added to Academic and Scholar Search Engines and Sources White Paper.

Earth, Science Frontiers (ESF)
http://www.elsevier.com/wps/product/cws_home/715023
Earth Science Frontiers (ESF), founded in 1994, is presently a bi-monthly journal in Chinese with English abstracts for most papers; a few articles are published entirely in English. It is a medium for the publication of original and forefront research and high quality reviews covering recent advances in all fields of Earth Sciences. It is a dominating topic journal, each issue is devoted to a single topic and edited by an authority in that field. Note: This title publishes a selection of papers from the original Chinese version.

TweetBeep - Like Google Alerts for Twitter
http://tweetbeep.com/
If you love Twitter, you'll love TweetBeep! Keep track of conversations that mention you, your products, your company, anything, with hourly updates! You can even keep track of who's tweeting your website or blog, even if they use a shortened URL (like bit.ly or tinyurl.com). Now, how cool is that?! Great for online reputation management, catching all your @replies and @mentions, finding job/networking opportunities, keeping up on your favorite hobby, and more. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

EnviroMapper - Web-based Interactive Mapping Tool for Viewing and Querying Environmental Information
http://www.epa.gov/enviro/html/em/index.html
With EnviroMapper, you have access to a wealth of environmental information on your desktop. EnviroMapper is a powerful tool used to map various types of environmental information, including air releases, drinking water, toxic releases, hazardous wastes, water discharge permits, and Superfund sites. Select a geographic area within EnviroMapper and view the different facilities that are present within that area. Create maps at the national, state, and county levels, and link them to environmental text reports. You can even insert dynamically created maps in your own webpages. If you have a web browser, you can use EnviroMapper.

Pressitt - Create Your Own Social Media News Release (SMNR)
http://pressitt.com/
Pressitt allows you to create your own social media news release (SMNR) - also known as a social media press release (SMPR) or social media release (SMR), and publish it to an online community of journalists, the blogosphere and the general public. Many journalists use the Internet as their primary research source when compiling a story. Pressitt SMNRs are designed primarily with journalists and bloggers in mind. A Pressitt SMPR encapsulates all the information, multimedia and images needed to prepare a story, and offers contact details for more information, all without the usual PR fluff. Through Pressitt, you can create news that is truly 'social', as well as enhance your SMNR with images and video clips. You can also add relevant links, upload PowerPoint presentations, PDFs, or whatever you need to get your message across. Once published, Pressitt allows your news to be bookmarked, commented on, and shared. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Social Informatics Subject Tracer™ Information Blog.

EnvironmentAsia
http://www.tshe.org/ea/
EnvironmentAsia is the international journal published biannually by the Thai Society of Higher Education Institutes on Environment (TSHE). The Journal publishes original research and review papers preferably in English covering all areas of Environmental

studies. Preference, however, is given to the papers of the following areas:

* Environmental Pollution & Safety Assessment
* Environmental Management,Protection and Conservation
* Environmental Economics
* Environmental Engineering
* Public Health and Sanitation
* assessment of Pollution and Pollutants
* Environmental Biology and Molecular Biology,
* Toxicant induced alterations in organisms
* General Toxicology (chronic, subchronic & acute), response to toxic agents at community, species, tissue, cellular & sub cellular levels
* All areas of Environmental Sciences

This has been added to Green Files Subject Tracer™ Information Blog.

TweetGrid - Real-Time Twitter Search Dashboard
http://www.tweetgrid.com/
TweetGrid is a powerful Twitter Search Dashboard that allows you to search for up to 9 different topics, events, converstations, hashtags, phrases, people, groups, etc in real-time. As new tweets are created, they are automatically updated in the grid. No need to refresh the page! This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Open Access Directory (OAD)
http://oad.simmons.edu/oadwiki/Main_Page
The Open Access Directory (OAD) is a compendium of simple factual lists about open access (OA) to science and scholarship, maintained by the OA community at large. By bringing many OA-related lists together in one place, OAD makes it easier for everyone to discover them and use them for reference. The easier they are to maintain and discover, the more effectively they can spread useful, accurate information about OA. Adding information to the OAD is easy. See their help section and contact us if you have any questions. OAD is a wiki and they count on their users to keep these lists accurate, comprehensive, and up to date. Their goal is for the OA community itself to maintain the lists with little intervention from the editors or editorial board. For quality control, they limit editing privileges to registered users. They welcome your contributions to the lists, ideas for new lists, and comments to help them improve OAD. Please contact them or use the discussion tabs on individual pages. OAD is hosted by the Graduate School of Library and Information Science at Simmons College and supervised by an independent editorial board. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Directory Resources Subject Tracer™ Information Blog. This has been added to Academic and Scholar Search Engines and Sources White Paper.

XBRL - eXtensible Business Reporting Language
http://xbrl.org/
XBRL is a language for the electronic communication of business and financial data which is revolutionising business reporting around the world. It provides major benefits in the preparation, analysis and communication of business information. It offers cost savings, greater efficiency and improved accuracy and reliability to all those involved in supplying or using financial data. XBRL stands for eXtensible Business Reporting Language. It is one of a family of "XML" languages which is becoming a standard means of communicating information between businesses and on the internet. XBRL is being developed by an international non-profit consortium of approximately 450 major companies, organisations and government agencies. It is an open standard, free of licence fees. It is already being put to practical use in a number of countries and implementations of XBRL are growing rapidly around the world. This site provides information about the nature, uses and benefits of XBRL. It explains how individuals and companies can join the effort to move forward and make use of the language. School libraries in Canada (SLIC): A Journal of the Canadian Association for School Libraries
http://www.clatoolbox.ca/casl/slic/
School Libraries in Canada (SLIC) Online is a journal of the Canadian Association for School Libraries. CASL's mission is to provide national support for the development and maintenance of exellence in Canada's school libraries, media centres, and school library personnel. Founded in 1980 (Volume 1 Issue 1), SLIC is a national forum for teacher-librarians in Canada and promotes articles of interest on a broad range of topics from collaboration with the classroom teacher to information technology/literacy skills needed to prepare students for life-long learning. Content in English and/or French.

Collabtive - Open Source Web Based Project Management Software
http://collabtive.o-dyn.de/
Collabtive is web-based project management software. The project was started in November 2007. It is Open Source software and provides an alternative to proprietary tools like Basecamp. Collabtive is written in PHP and JavaScript. Collabtive is intended for small to medium-sized businesses and freelancers. They offer commercial services for installation and customization of Collabtive. It can also be installed on an internal server as well as in the cloud. All major browsers like Internet Explorer (7/8), Firefox, Opera, Safari, and Chrome are supported. Collabtive is developed by a team of professional volunteers. Everyone involved is a pro in their respective areas, providing high quality contributions to the project. Features include: 1) Core functionality: a) Unlimited projects, milestones, tasklists, and tasks; b) Unlimited members with user profiles; c) Role-based permission management; d) Messaging and instant messaging; e) File management; and f) Timetracking; 2) Reporting and notifications: a) Timetracker reports,

activity logs and messages in PDF format; b) Export user profiles as vCard; c) RSS feeds for messages and tasks; d) Synchronization of calendars via iCal task export; e) Excel files from activity logs and timetracker reports; and f) E-mail notifications; and 3) Other: a) Search, tags; b) Basecamp import; c) Fully themeable; d) Available in more than 25 languages; and e) Full UTF8 support. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

AskDeb - Aske Questions and Receive Answers Online
http://www.askdeb.com/
AskDeb.com is a resource site where professional researchers and writers answer questions on a variety of subjects, including dating, relationships, beauty, careers, personal finance, and travel. The mission of AskDeb.com is to provide real answers to real questions on almost any subject. This has been added to Internet Experts Subject Tracer™ Information Blog.

Market Potential Index for Emerging Markets 2008
http://globaledge.msu.edu/resourceDesk/mpi/
Global marketing is becoming more and more important along the years with the increasing trend in internationalization. Having too many choices, marketers face the challenge of determining which international markets to enter and the appropriate marketing strategies for those countries. The focus of this study is ranking the market potential of countries identified as "Emerging Markets" by The Economist magazine. These emerging economies comprise more than half of the world's population, account for a large share of world output, and have very high growth rates; all indicators of enormous market potential. This indexing study is conducted by MSU-CIBER to help companies compare the Emerging Markets with each other on several dimensions. Eight dimensions are chosen to represent the market potential of a country over a scale of 1 to 100. Each dimension is measured using various indicators, and are weighted in determining their contribution to the Overall Market Potential Index. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Journal of Writing Research (JoWR)
http://www.jowr.org/
The Journal of Writing Research (JoWR) is a new international peer reviewed journal that publishes high quality theoretical, empirical, and review papers covering the broad spectrum of writing research. The mandate of the Journal of Writing Research is:

* to publish excellent and innovative writing research drawn from a range of academic disciplines (e.g. psychology, linguistics, pedagogy, design studies, communication studies, information and communication technology, learning and teaching)
* to stimulate interdisciplinary writing research
* to be fully international
* to apply high academic standards, including double blind peer review
* to share knowledge through open access.

They encourage the submission of manuscripts in one of the following forms

* reports of empirical studies
* review papers and meta-analyses
* theoretical position papers

The journal also welcomes explorations of difficult or controversial topics, and is interested in publishing non-paradigmatic and non-traditional ideas that meet the criteria for excellent scientific research. Empirical studies may use all appropriate methods, including experimental, survey and case study designs and both quantitative and qualitative methods of analysis. The Journal of Writing Research will also consider proposals for special issues on a specific theme.

Go2web20 - Web 2.0 Tools and Applications
http://www.go2web20.net/
For the past two years, Go2web20 has been one of the biggest web2.0 directories out there. They built this application to enable people to stay up to date with all the new & hot services that are born daily into the web. In many cases, Go2web20 has been the first to report the existence of a new application. Today Go2web20 includes over 2,700 services and more are uploaded everyday. They also make sure to disable services that are no longer working and by doing this we ensure a more useful and enjoyable experience when performing a search. They believe that this is a natural behavior and logical progress - not all the services that you see here will live forever, but they'll serve you for as long as they live. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to World Wide Web Reference Subject Tracer™ Information Blog. This has been added to Directory Resources Subject Tracer™ Information Blog.

Glearch - Global Search By Country, By Language, and By Search Engine
http://www.glearch.com/
Glearch stands for "Global + Search" and is a search tool for global business professionals, researchers, travelers and any one who would like to perform searches by specific countries and languages. Glearch selects the top results from Google, Yahoo and MSN as well as the most popular search engines for the selected country and returns results. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Scoopler - Real Time Search
http://www.scoopler.com/
Scoopler is a real-time search engine. They aggregate and organize content being shared on the internet as it happens, like eye-witness reports of breaking news, photos and videos from big events, and links to the hottest memes of the day. They do this by constantly indexing live updates from services including Twitter, Flickr, Digg, Delicious and more. When you search for a topic on Scoopler, they give you the most relevant

results, updated in real-time. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

SAE International Journal of Engines
http://saeeng.saejournals.org/
The journal publishes peer reviewed cutting-edge technical papers providing the most authoritative and in-depth work in engine research. Coverage includes: Homogeneous Charge Compression Ignition; Spark Ignition Engines; Diesel Engines; Electric Vehicles; Fuel Cell Vehicle Applications; Combustion; Electronic Engine Controls; Engine Components; Emissions Control Systems; and Fuel Economy. In addition to being identified as some of the best published work at SAE International, these papers as a set have long-term reference to the engineering community and to society at-large.

Technology, Entertainment and Design (TED)
http://www.ted.com/
TED is devoted to giving millions of knowledge-seekers around the globe direct access to the world's greatest thinkers and teachers. Riveting talks by remarkable people, free to the world. TED stands for Technology, Entertainment, Design. It started out (in 1984) as a conference bringing together people from those three worlds. Since then its scope has become ever broader. This has been added to Tutorial Resources Subject Tracer™ Information Blog.

Knowledge Ecology International (KEI)
http://www.keionline.org/
KEI is an organization that searches for better outcomes, including new solutions, to the management of knowledge resources. There are probably 5 billion people who live in the margins of the global economy, and an entire planet that depends upon knowledge for economic and personal development, education and health, political power and freedom, culture and fun. We are just now learning about the opportunities to manage knowledge resources in ways that are more efficient, more fair, and responsive to human needs. KEI undertakes and publishes research and new ideas, engages in global public interest advocacy, provides technical advice to governments, NGOs and firms, enhances transparency of policy making, monitors actions of key actors, and provides forums for interested persons to discuss and debate KE topics. This has been added to Knowledge Discovery Subject Tracer™ Information Blog.

ITDatabase - Precise Tech Media Research
http://itdatabase.com/index13.html
ITDatabase is the only research tool focused specifically on tech media. No matter which tech category your business falls under — networking gear, enterprise applications, systems management software, or even consumer tech categories like netbooks or cell phones — ITDatabase is the most powerful research tool to support your marketing, publicity and sales efforts. ITDatabase delivers actual answers to your tech industry research questions. ITDatabase monitors more tech content sources (business press, trade

press, blogs, podcasts, vidcasts) and authors (including contact information) than any other news clipping, media directory or PR management platform on the market. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog. This has been added to Business Intelligence Resources Subject Tracer™ Information Blog.

Quantitative and Qualitative Analysis in Social Sciences (QASS)
http://www.qass.org.uk/
The mission of the Quantitative and Qualitative Analysis in Social Sciences (QASS) is to promote free and effective scientific communication across a broad spectrum of researchers. Whilst its primary disciplines are economics, finance and econometrics the journal includes contributions from mathematics and statistics. Economic behaviour needs to be understood in many dimensions and at many levels. QASS aims to strike a balance between analytical rigour and practical relevance with the view that economic analysis is a means to an end rather than an end in itself. The journal invites submissions of original articles in all fields of economics. Specific research areas covered include: financial economics; international economics; macroeconomics; microeconomics; political economy. QASS publishes high quality research in all areas of finance, striving to establish an interface between theory and practice and promote debate. Contributions that deal with issues and policies of the real financial world are particularly welcomed. Topic areas include: accounting; capital and security markets; corporate finance and corporate governance; financial engineering; mathematical finance; risk management. The journal welcomes creative contributions across a wide range of issues concerned with all aspects of econometrics and statistics. The following research areas, although not exhaustive, are representative of the coverage in this journal: applied probability; econometric theory; financial econometrics; statistical mathematics; time series analysis.

Sakai CLE - Free Open Source Collaboration and Learning System
http://www.sakaiproject.org/
The Sakai CLE is a free and open source Courseware Management System. It features a set of software tools designed to help instructors, researchers and students collaborate online in support of their work--whether it be course instruction, research or general project collaboration. For coursework, Sakai provides features to supplement and enhance teaching and learning. For collaboration, Sakai has tools to help organize communication and collaborative work on campus and around the world. Using a web browser, users choose from Sakai's tools to create a site that meets their needs. To use Sakai, no knowledge of HTML is necessary. But the product vision reaches beyond teaching and learning applications. Many Sakai deployments include as many or more project and research collaboration sites. In addition, the Open Source Portfolio e-Portfolio system is a core part of the Sakai software. Finally, the Sakaibrary project links library resources to Sakai. Sakai is distributed as free and open source software under the Educational Community License. Access to this code is extremely valuable to those who want to customize their on-campus instance or wish to develop innovative new tools. But open source code is important to the entire Sakai community. The ability to make that

one change to the code for your campus can be crucially important and that change can be added to the Sakai code base, removing the need for customization as you upgrade. And the source code serves as the ultimate insurance policy, ensuring that you aren't locked into a single vendor. Learn more by reading Sakai Profiles or Case Studies. This has been added to the tools section of Research Resources Subject Tracer™ Information Blog.

Awareness Watch™ Paper Review

Where Is the cloud? Geography, Economics, Environment, and Jurisdiction In Cloud Computing by *Paul T. Jaeger, Jimmy Lin, Justin M. Grimes, and Shannon N. Simmons*
http://www.uic.edu/htbin/cgiwrap/bin/ojs/index.php/fm/article/view/2456

Abstract:
Cloud computing – the creation of large data centers that can be dynamically provisioned, configured, and reconfigured to deliver services in a scalable manner – places enormous capacity and power in the hands of users. As an emerging new technology, however, cloud computing also raises significant questions about resources, economics, the environment, and the law. Many of these questions relate to geographical considerations related to the data centers that underlie the clouds: physical location, available resources, and jurisdiction. While the metaphor of the cloud evokes images of dispersion, cloud computing actually represents centralization of information and computing resources in data centers, raising the specter of the potential for corporate or government control over information if there is insufficient consideration of these geographical issues, especially jurisdiction. This paper explores the interrelationships between the geography of cloud computing, its users, its providers, and governments.

Subject Tracer™ Information Blogs

Subject Tracer™ Information Blogs created and developed by the Virtual Private Library™ combine the best of the latest tools on the Internet. Using bots, blogs and news aggregators the Subject Tracer™ Information blogs generate RSS feeds with the latest resources to create a current information resource flow through niched subject tracers. I am proud to be the creator of the Internet's first Subject Tracer™ Information Blogs:
